Statistical and non statistical questions (video) | Khan Academy

A statistical question is one that can be answered by collecting data and where there will be variability in that data. For example, there will likely be variability in the data collected to answer the question, "How much do the animals at Fancy Farm weigh?" but not to answer, "What color hat is Sara wearing?". Created by Sal Khan.

STATISTICAL Synonyms: 5 Synonyms & Antonyms for STATISTICAL ...

You presumably did not learn it merely by reading or hearing about dogs, let alone remembering the statistical distribution of the word "dog" in sentences you read or heard, but by seeing a real dog or a picture of one, and being told what it is. That test arises from the basic statistical principle that the difference between the median and the mean indicates the level of skew in ...
